

David Seungwoo Lee

Dimmer Board Operator - Lighting Programmer - Key Grip - Best Boy Electric

CREDITS

Swing Grip (Day Player) - *Save Yourself* (PSA)

5/16/25

Director: Lawrence Hu

DP: Afrim Zenuni

Key Grip - *Fight Night* (Live Comedy Show)

4/26/25

Director: Jorge Cotte

DP: Destinee Russell

Swing Grip (Day Player) - *Roadworthy* (Feature)

4/25/25, 4/29/25

Director: Michael Charles Roman

DP: Luke Miller

Swing/Dimmer Board Operator - *Clothes On Our Backs* (Short)

3/27/25-3/30/25

Director: Vishaal Desai

DP: Victor Garcés

Grip - *Turner Classic Movies: Silent Sundays with Jacqueline Stewart* (Corporate)

2/13/25

Executive Producer: Scott Robinson

DP: Aiden Allen

Best Electric (Day Player) - *First Chair* (Short)

2/2/25

Director: Cassidy Tee

DP: Edward Chao

AC/Gaffer - *"26 Missed Calls" NPR Tiny Desk Submission* (Live Music Recording Session)

1/6/25

Artist: Liam Taylor

DP: Annika Newton

Dimmer Board Operator - *The Séance* (Short)

12/6/24-12/8/24

Director: Khafre Liggins

DP: Afrim Zenuni

Best Electric/Key Grip - *Fire Level* (Web Series)

11/20/24, 11/25/24-11/26/24, 12/09/24-12/10/24, 5/8/25

Director: Tony Roth

DP: Logan Parrish

Lighting Console Programmer - *Mold* (Short)

11/07/24-11/08/24

Director: Afrim Zenuni

DP: Afrim Zenuni

Dimmer Board Operator - *Scream 'Til You Bleed* (Short)

10/25/24-10/27/24

Director: Eli Buie

DP: Audrey Weber

Dimmer Board Operator - *He* (Short)

7/10/24-7/17/24

Director: Yihui Hu

DP: Aris Kai Lui

Swing Electric - *St. Isaac* (Short)

6/28/24

Director: Fred Pelzer

DP: Meredith Smith

Notable Sets

Roadworthy

Roadworthy was a feature film shot in Wisconsin. This production gave me condor experience as I adjusted two Aputure XT26's, a 1000C, and their accessories at approximately 30 feet above the ground.

Other lights G&E operated were mostly high-power HMI lights such as the Arri M90, M40, and M18 from a distrobox powered by a truck generator.

The Séance

The Séance required our team to dress the living room with multiple fabrics, 4 combos, and around 40 feet of speed rail. The space had a circular table, in which we had dolly track going around, and then we switched out the table for one with a hole in the middle to allow the camera to capture 360 degree shots. A mixture of tungsten and LED lights were rigged above on the speed rail to avoid line of sight. Once rigged, we had multiple tungstens going into two Shadowmakers, and the LED's connected to a RatPAC AKS+ which I then programmed a few effects and looks with using Blackout.

Mold

Mold needed me to figure out a way to flicker multiple LED fixtures along with a range of tungsten lights with different wattages. LED fixtures included a Vortex 8, Arri Skypanel, and Astera Titans. Tungstens ranged from Tweenies to Maxibrutes.

One of the shots also required the camera to be overexposed from underexposure within 1 second. This required precise wattage/ampereage calculation, as well as an organized hard-line DMX and wireless CRMX network to execute the effect correctly but also safely.

Dimmer Board Operator - *Lluvia* (Music Video)

5/30/24-6/1/24

Band: Kronovox

DP: Victor Garcés

Dimmer Board Operator - *Marble Tissues* (Short)

4/5/24-4/8/24, 4/12/24-4/15/24

Director: Karson Kane

DP: Nick Emmanuele

Dimmer Board Operator - *Lone Star* (Short)

3/8/24-3/9/24

Director: Eli Buie

DP: Tor Olson

Electrician - *It Ends* (Short)

3/1/24-3/3/24

Director: Adelle Johns

DP: Emma Donlevy

Dimmer Board Operator - *The Leaching* (Feature)

2/28/24-2/29/24, 3/15/24-3/17/24

Director: Evan Showalter

DP: Amarillys Velasquez

Dimmer Board Operator - *Rose Colored Lenses* (Short)

2/17/24-2/18/24, 2/23/24-2/25/24

Director: Tanja Meyer and Tyler Grandalski

DP: Karson Kane

Grip - *Dancing While Crying in the Middle of Nowhere* - (Music Visualizer)

12/17/23

Director: Noah Keckler

DP: Sofia Santos

Grip - *Rot* (Short)

12/8/23, 12/11/23, 12/13/23

Director: Fred Pelzer

DP: Meredith Smith

Swing Electric - *Don't Speak + No Melody + Eureka* (Music Video)

12/1/23-12/3/23

Director: Dallys Dorsey

DP: Danny Lencioni

Grip - *Just a Drop* (Short)

11/11/23

Director: Evan Showalter

DP: Sofia Santos

Grip - *Jitter* (Short)

11/9/23, 11/10/23

Director: Evan Showalter

DP: Sofia Santos

Swing Electric - *Oz* (Music Video)

10/27/23, 10/28/23

Director: Jewells Santos

DP: Paige Hochstatter

Grip - *Caught in the Storm* (Short)

10/20/23-10/22/23

Director: Adelle Johns and Zeeyn Bertraud

DP: Emma Donlevy

Lluvia

Lluvia was a music video shot in three days. I built the hardline DMX+CRMX and WiFi Network that would allow me to control 8 Astera Bulbs, 5 Tubes in Pixel mode, 2 Geminis, 2 SkyPanels, and 3 Leekos going into a RatPac Dimmer Lunchbox.

After creating the network, I programmed multiple effects from chases, pulses, and strobes, all set on specific or changing CCT, as well as transitioning through multiple different color combinations. Effects were also cued live to the performance and music.

Marble Tissues

Marble Tissues was a short film that was shot over two weekends. We had multiple locations including a two-story home, sound stage, two different city apartments, and a K-12 school. On the sound stage, we built a 40 foot long void with rags, combos and speedrail, as well as a build overhead rigs for lights with wireless control. I set up the CRMX and WiFi network to have control of lights in all the different spaces, as well as program a few lighting gags on the fly on Blackout Lighting Console.

The Leaching

The Leaching was a feature length film that was shot over the course of two weekends. We built a car rig, lit a forest at night, as well as an entire three story house multiple ways for a composite shot. I additionally built a kit that could utilize Luminair on my iPad for dimming and lighting gags with LED's.

Dancing While Crying in the Middle of Nowhere

DWCITMON is a visualizer for an artist's upcoming album, and we had to create 8 different visual looks over the course of a 10 hour day with a 4 person G&E crew.

Oz

Oz was shot on film and required the use of multiple T12's, Maxibrutes, LED panels and tubes within the vicinity of a water rig. Worked with the team to make sure lights and power were safe to run.
